DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 11-15 are rejected under 35 U.S.C. 101 because the terminology "computer program product" alone has no set definition, hence the claimed invention is directed to non-statutory subject matter. The statutory product with descriptive material must include a positive recitation of the computer readable medium (see MPEP 2106).

Allowable Subject Matter

4. Claims 1-10 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claims 1 and 6, the prior art, either taken singly or in combination, does not teach:

- reducing a density difference within the edge region; and compressing the image data within the edge region where the density difference is reduced, using discrete cosine transform.
